Projects

LOK8R - github.com/mrected/LOK8R

LOK8R is a search tool for finding missing or estranged family members. It matches users only if who they are searching for is also searching for them, and currently in the database. This allows for an in-depth search with minimal information.

- Built with HTML, CSS, JavaScript, React, Ruby, Rails, PostgreSQL & Illustrator
- Created a search feature that checks the user's data against existing data, and only returns true there is a preexisting search present that is also searching for the current user.
- Uses Auth0 to handle authentication and account creation.
- Designed logo and UI interface for simplicity and ease of use on mobile thru desktop interaction.

Central Ave Shirt Co - github.com/mrected/Central-Ave-Shirt-Co

Central Ave Shirt Co is an apparel website I created using a mix of vanilla JavaScript and jQuery to create a custom framework on Bootstrap's grid system.

- Built with HTML, CSS, JavaScript, jQuery, Bootstrap, Photoshop, Illustrator, and provided Photography
- Designed custom UI interface and navigation from scratch, built on Bootstrap containers and grid.
- Created a custom framework from JavaScript and jQuery that updates all site data dynamically.
- Implemented and modified a chat feature and apparel designer from external plugins.

Autoplate.net - github.com/mrected/AutoPlate

AutoPlate is a custom Bootstrap website intended for custom license plate distributors and their prospective clients.

- Built with HTML, CSS, JavaScript, jQuery, Bootstrap, Photoshop & Illustrator
- Created custom UI with modified Bootstrap framework using grid, containers, carousel, buttons, and tables.
- Built custom navigation using CSS and JavaScript with Bootstrap.
- Created .pdf templates for all products.

Work Experience

Helinger Advertising - Web Developer / Art Director
February 2010 - October 2018, St Petersburg, FL

- Created mock-ups for websites and products based on client design specs.
- Handled all facets of client art requests and delivered proven results based on corporate branding guidelines and budget requirements.
- Successfully managed cross-functional teams of 20+ people.
- Put in place efficiency procedures that increased sales revenue by 15% year over year.
- Stayed current with the latest design style, software, and development technologies including system technology and web development.
